The EA mentioned above evaluates potential impacts

from a proposed airport expansion in West Virginia and development of a contiguous business park (100 acres). The project area will be leveled so cut and fill operations are proposed which will permanently impact streams (7000+ lf) and 25 wetlands (4.909 acres in total, mostly PEM). 404 provided technical comments on the proposal/ ACOE permit application in August and a two weeks ago, the Corps issued an individual permit for the project. The project sponsor has committed to a mitigation banking/in lieu fee approach to offset the resource loss.
